Activity 1.4

Instructions:

- 1. Create a two-column chart with the headings "Pros" and "Cons".
- 2. Research the pros and cons of anthropomorphism in social robot design and list them in the appropriate column of your chart.
- 3. Analyze the pros and cons that you have listed and identify any patterns or trends that emerge.
- 4. Consider the following questions:
 - a) Which arguments are most persuasive to you and why?
 - b) What factors could influence user acceptance of social robots beyond anthropomorphism?
 - c) Based on the arguments presented, what is your opinion on whether a social robot should have very few human-like cues or be highly anthropomorphic in design?

Pros	Cons

You can share and discuss your opinions in Discord.
